DETAILED ACTION

Remark

- This Office Action is in response to applicant's amendment filed on January 16, 2002, which has been entered as paper number 17:
- By this amendment, the applicant has amended claims 1-4, 7, 8, 15-16, and 19-20. Claims 1-20 remain pending in this application.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-9, 15-20 and 13-14 dependent therefore are rejected under 35 U.S.C. 103(a) as being unpatentable over the patent issued to Imamura et al in view of the patent issued to Harris et al.

The reasons for rejection are set forth in the previous Office Action dated August 16, 2001.

Claims 1-4, 7-8, 15-16 and 19-20 have been amended to include the additional feature having the first and the second *gratings* accumulated with a space there between. Imamura et al teaches that the two gratings (21 and 22) formed at the interfaces are accumulated with a space there between, (please see Figure 14).

Response to Arguments

7. Applicant's arguments filed January 16, 2002 have been fully considered but they are not persuasive. The newly amended claims have been fully considered and are rejected for the reasons stated above.

8. In response to applicant's argument which states that the set of claims (1, 2 and 6-8) recite the diffraction grating and the alignment pattern **integrally** formed on the substrate and the second set of claims (15-20) recite the diffraction grating and the alignment pattern formed on the substrate, which therefore are patentably distinct the examiner respectfully disagrees. The specification only shows **one arrangement** of the diffraction grating and alignment pattern, which is having the diffraction grating and the alignment pattern formed on the substrate, (please see Figure 13 of the specification). The specification therefore **fails** to provide the **any distinction and patentable distinction** between the claimed and argued features concerning "integrally formed" and the simply "formed" on the substrate. These two sets of claims therefore have the same scopes. The rejection under double patenting therefore stands.

9. In response to applicant's arguments concerning the cited Imamura et al reference the Harris et al reference and the Tomono reference, the examiner respectfully refers the applicant to read the reasons for rejection set forth in the previous Office Action dated August 16, 2001.

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2872

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
